

CEUs - CONTINUING EDUCATION UNITS

Safety Week

[3 DAYS INSTRUCTION]
COURSE OVERVIEW

Safety Week is a combination of short courses available at the Keewatinoook Centre. Safety is a form of preventive maintenance which includes equipment and machinery and its proper handling. Everyone should be responsible for safety, from top management to all employees. Safety is using one's knowledge or skill to avoid accidents or to protect oneself and others from accidents

COURSE OUTLINE

- Water Sources and Characteristics. Recognize the physical, chemical, and microbiological characteristics of water.
- WHMIS - Workplace Hazardous Materials Information System.
- Lock Out and Tag Out. Define lock out and tag requirements in the workplace.
- TDG - Transportation of Dangerous Goods. This course is intended to give operators the vital information they need to protect the public from hazards of an accidental spill or leak.
- Safety in the Workplace. Learn the responsibilities of operators and management for waterworks safety. Recognize the hazards and discuss how to handle a variety of situations.

TARGET AUDIENCE

Water utility field staff, forepersons, supervisors, managers, contractors, water utility construction inspectors, and fire department personnel.
